HIGH PERFORMANCE

Three Flute Aluma Carb – Square End & Radius

- Designed for outstanding performance and accelerated material removal speeds and feeds in aluminum and non-ferrous materials
- Excellent performance in High-Speed Machining
- Constructed with specialized combination of features for excellent performance in roughing and finishing applications
- Wiper flat design that leaves outstanding floor finish
- Engineered with a high helix and high rake flute design
- HTB coating is recommended for superior tool life and edge retention
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Three Flute Fox Carb – Square End & Radius

- The variable pitch geometry and eccentric relief geometry allows for maximum edge strength in both roughing and finishing applications
- Specially engineered end mills result in higher quality parts by decreasing chatter and improving finishes
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels.
- Engineered with a variable pitch and 3 flutes for reduced harmonics, increase chip evacuation
- With the eccentric relief for maximum edge strength the 3 flutes are ideal for full slotting and heavy material removal applications
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Four Flute Fox Carb – Square End & Radius

- The variable pitch geometry and eccentric relief geometry allows for maximum edge strength in both roughing and finishing applications
- Specially engineered helix and rake angles result in higher quality parts by decreasing chatter and improving finishes
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Five Flute Fox Carb – Square End & Radius

- 5 flute variable pitch design for reduced harmonics and increased feed rates
- Specially engineered helix and rake angles result in higher quality parts by decreasing chatter and improving finishes
- For light profiling and finishing applications, this tool is constructed for High-Speed Machining
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels.
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Six Flute Fox Carb – Square End & Radius

- 5 flute variable pitch design for reduced harmonics and increased feed rates
- Specially engineered helix and rake angles result in higher quality parts by decreasing chatter and improving finishes
- For light profiling and finishing applications, this tool is constructed for High-Speed Machining
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels.
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Seven Flute Fox Carb – Square End & Radius

- The variable pitch geometry and rake design allows for maximum edge strength in both roughing and finishing applications
- Specially engineered end mills result in higher quality parts by decreasing chatter and improving finishes
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and alloy steels
- Special End cutting geometry (non-center cutting)
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

HIGH PERFORMANCE

Four Flute Fox Carb Ball Mill

- The variable pitch geometry and eccentric relief geometry allows for maximum edge strength in both roughing and finishing applications
- Specially engineered helix and rake angles result in higher quality parts by decreasing chatter and improving finishes
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Five Flute Fox Carb Ball Mill

- 5 flute variable pitch design for reduced harmonics and increased feed rates
- Specially engineered eccentric relief with unique helix and rake angles result in higher quality parts by decreasing chatter and improving finishes
- For light profiling and finishing applications, this tool is constructed for High-Speed Machining
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

HIGH PERFORMANCE

Four Flute Carbide Roughing Mills – Fine Pitch

- Unique 4 flute design low profile edge geometry for chip evacuation and vibration reduction
- Offers exceptional performance in high temperature resistance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Optimal roughing tooth profile to reduce cutting forces
- Engineered tool geometry for high feed rate and light cutting in hard materials
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- All Tools 1/2" & Under get a .020" x 45° Chamfer
- All Tools 5/8" & Over get a .030" x 45° Chamfer
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

HIGH PERFORMANCE

Four Flute Carbide Roughing Mills – Coarse Pitch

- Unique 4 flute design low profile edge geometry for chip evacuation and vibration reduction
- Deep slotting and profile applications with heavy metal removal in softer steel are perfect for the coarse pitch rougher
- The coarse pitch profile works well in a wide range of ferrous materials, but also in nonferrous materials like aluminum
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- All Tools 1/2" & Under get a .020" x 45° Chamfer
- All Tools 5/8" & Over get a .030" x 45° Chamfer
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Five Flute Carbide Roughing Mills – Fine Pitch

- The 5 flute design with unequal, low profile edge geometry for vibration reduction and better surface finish compared to a 4 flute roughing mill
- Offers exceptional performance in high temperature resistance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Optimal roughing tooth profile to reduce cutting forces
- Engineered tool geometry for higher feed rates compared to the 4 flute roughing mill and light cutting in hard materials
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- All Tools 1/2" & Under get a .020" x 45° Chamfer
- All Tools 5/8" & Over get a .030" x 45° Chamfer
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

Five Flute Carbide Roughing Mills – Coarse Pitch

- The 5 flute design with unequal, low profile edge geometry for vibration reduction and better surface finish compared to a 4 flute roughing mill
- The coarse pitch profile works well in a wide range of ferrous materials, but also in nonferrous materials like aluminum
- Optimal roughing tooth profile to reduce cutting forces
- Engineered tool geometry for higher feed rates compared to the 4 flute roughing mill and light cutting in hard materials
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- All Tools 1/2" & Under get a .020" x 45° Chamfer
- All Tools 5/8" & Over get a .030" x 45° Chamfer
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

4fl Rougher/ Finisher

- Roughing/Finishing End Mills are used for removing large amounts of material quickly but leaving behind a finish that's almost as smooth as a traditional end mill
- Offers exceptional performance in high temperature resistance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Saves time over a traditional two-step roughing and finishing process
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- All Tools 1/2" & Under get a .020" x 45° Chamfer
- All Tools 5/8" & Over get a .030" x 45° Chamfer
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

4fl Double Radius Mills

- The multiple cutting surfaces of a 4 flute end mill allow it to increase the rate of metal removal, especially when machining harder materials
- Offers exceptional performance in high temperature resistance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Specially engineered fluting and end work allow smooth finishes on the workpiece, especially on softer materials
- With double the feed rate capabilities compared to a standard end mill, for many applications, this tool is constructed for High Efficiency Machining
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys
- For Weldon Flat – Add W to the part number and add \$6.00 to cost

5fl Double Radius Mills

- The multiple cutting surfaces of a 5 flute end mill allow it to increase the rate of metal removal, especially when machining harder materials
- Offers exceptional performance in high temperature resistance in a wide range of ferrous materials, including cast iron, tool steels and low and medium alloy steels
- Specially engineered fluting and end work allow smooth finishes on the workpiece, especially on softer materials
- With double the feed rate capabilities compared to a standard end mill, for many applications, this tool is constructed for High Efficiency Machining
- The 5 flute geometry allows for higher feeds and improved surface finish for lighter cuts
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- HDT coating is exceptional for applications requiring high material removal rates by providing excellent wear resistance and high thermal resistance in super alloys

Multi-Flute Finishers – Square End & Radius

- Designed with high flute count for excellent performance in High Efficiency Machining, light profiling and finishing applications
- Specially engineered end mills result in higher quality parts by decreasing chatter and improving finishes
- Offers outstanding performance in a wide range of ferrous materials, including cast iron, tool steels and alloy steels
- Special End cutting geometry (non-center cutting)
- Alcrona coating offers high resistance to materials over 42 Rc, which can help increase speeds and feeds as well as tool life
- Talon coating is formulated for super alloys, such as nickel, inconel and waspaloy
- For Weldon Flat – Add W to the part number and add \$6.00 to cost
